Justin Carr wanted World Peace since he was 4 years old. He loved swimming, design and performing arts. He was vibrant and a seemingly healthy 16-year-old Junior at Harvard-Westlake high school. He died during his usual swim team practice from an undiagnosed heart condition on February 22, 2013. Darrell & Susan Carr want to save other families from dealing with an unimaginable loss that can be prevented.

According to Parent Heart Watch, “Sudden Cardiac Arrest (SCA) is not a heart attack – it’s the sudden onset of an abnormal and potentially fatal heart rhythm that causes the heart to beat ineffectively or not at all. The underlying cause of SCA can be a heart condition you’re born with (often inherited) and/or can develop as young hearts grow. SCA can also be triggered from a viral illness, or a blow to the chest from an object or a person.”
